

Lights were on in Vegas

Conexpo show in Vegas closed its doors after 5 days of products showcase which drove people from across the planet.

VEI booth was an attraction with its shining and powerful graphics and new products as the ADT truck weighing and the remote printout with VKIOSK.

First time presented at Conexpo the new scales Millennium5 and HelperX have been gathering the attention of visitors and great compliment from customers across North America which are already using them and they are already a lot in a year time since their introduction in the market.

X and 5 as the new units short name is, bring onboard weighing and productivity monitoring to the next level with the user friendly interface and plenty of new feature which makes your job easier and automated. By listening to our worldwide customers base into the aggregate, forestry, agriculture and scraping sectors we have created the X and 5 scale units capable in answering every demand in the market. At the end the show was good but we have seen a deflection when compared to the previous editions. We wish all to come back in 2017 which will be VEI 9th Conexpo.

OLD AND NEW CUSTOMERS GATHERING

It was a great chance to meet customers and dealers and show them the new products which will allow them to meet the customers need in load out automation and productivity monitoring. Thanks to Wayne from Ontario for stopping by. Wayne is one of the oldest VEI customer and friend in North America, using still his first unit, the Helper P5 bought in 1998, first unit legal for trade in the market. The scale has performed perfectly until today and with its data downloading capability incorporated since back then, Wayne is keeping track of his sales and invoicing.

Thanks to Chad, Jack, Chris, Jeff, Josh, Courtney, Juan Pedro, Andres, Alejandro, Bob, Clemente, Donald, Scott, Appleby and daughter, Felix and many others for stopping by; it was nice to see you again and we wish you success with the new VEI products.
